

Treatment Couches

'Designs for Life'

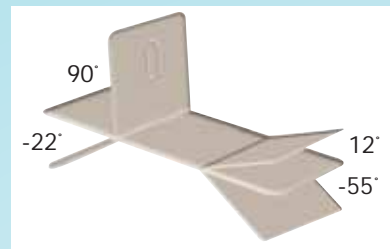

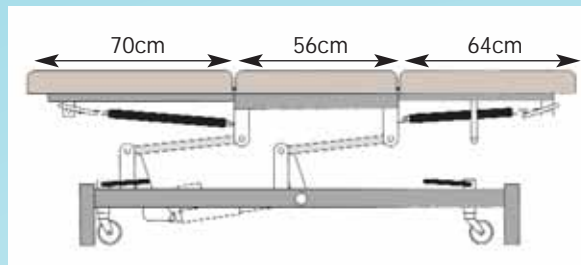

Finesse Variable Height 3 Section

Utilising a high grade electric actuator lifting upto 205Kg (standard). This couch is also available with a Hydraulic lift mechanism
 With an operating height from 450mm to 930mm, making this couch ideal for transferring patients from wheel chairs to deliver various treatment protocols.
 Featuring a standard width of upholstery at 610mm. Wider options of upholstery at (660mm) & (690mm) available on request. With rigid locking gas spring at head section and twin gas springs at foot section. Incorporating a unique self levelling system on the foot section to protect against accidental damage when lowering the couch.

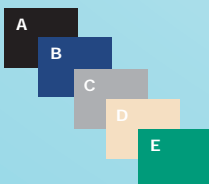

This strong "twin lift" mechanism provides stability. With an open base design, levelling foot, breathing hole and paper roll holder included as standard.

We offer a choice of 5 vibrant colours, with Beige and Dark Blue as standard. The Finesse range combines quality and durability with style and elegance. In addition all models offer an unrestricted access for hoists and allow for a range of patient treatments.

Multi Cabinet

Medina Multi Combined Bedside Cabinet and Bedside Table, is manufactured to the highest standards. Enables left or right side bed usage, as both the cabinet and draw operate from both sides. The adjustable height and angle over bed table has a variety of usages for the patient such as:-

- Catering
- Reading

The table folds neatly into the frame exposing a useful lower basket area for additional storage. This also allows for smaller storage space.

The durable metal frame comes in a choice of colours as does the cabinet which is available in several laminate patterns.

Complete with antistatic lockable castors for easy movement.
