

Wide Neurology Plinth 2

www.medinabutor.co.uk

Our 2 section wide neurology plinth has been designed to give excellent rigidity and stability.

Utilising a high grade electric actuator lifting upto 300Kg (standard) The large upholstered top allows the therapist to undertake a range of neurological treatments. The strong "twin lift" mechanism provides stability and rigidity. With an open base design, levelling foot, breathing hole included as standard.

The head section is supported with twin gas springs for stability. Featuring a standard width of upholstery at 1050mm.

A wider option of upholstery is available at 1200mm on request.

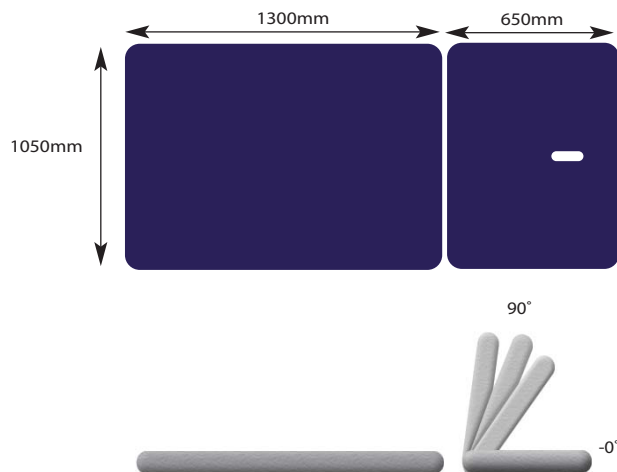

The low operating height from 450mm to 800mm is ideal for patient transfer from wheel chair to plinth and an easy working height for the therapist. With a backrest that is adjustable from horizontal 0° to +90° for patient and therapist comfort. This couch is also available with an electric backrest mechanism.

Beige and Dark Blue are standard colours.

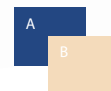

In addition all models give an unrestricted access for hoists and allow for a range of patient treatments.
