### Saddle Seat Height Adjustable Stool

#### *Contoured Saddle stool*

Many studies have shown that the more time we spend seated, the greater the onset of spinal pain. This stool has been designed to allow working in a seated position while keeping the spine straight. All stools come equipped with wheels. Using "gas assist" to rotate and height adjust.

Min Height: 65cm, Max Height: 90cm  
(Limited colours available)

### Tabouret Adjustable Height Mobile Stool

This Tabouret has the added facility of a gas spring adjustable height mechanism which provides height range from 43 - 56cm. Dimensions: 65cm L x 36cm W x 43-56cm H

### Adjustable Height Treatment Stool

This comfortable stool can be easily raised and lowered when treating at different heights.

Minimum Height: 38cm  
Maximum Height: 45cm  
(Limited colours available)

### Flat Top Height Adjustable Stool with Five Spoked Wheel Base

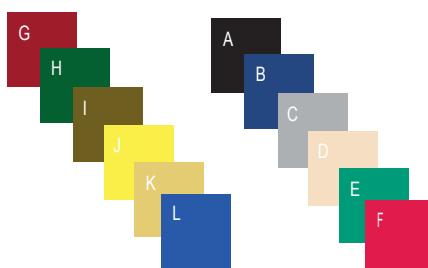

#### *A Flat Top Height Adjustable Stool*

Many studies have shown that the more time we spend seated, the greater the onset of spinal pain. This stool has been designed to allow working in a seated position whilst helping to keep the spine straight. All stools come equipped with wheels. Using "gas assist" to rotate and height adjust.

Min Height: 50cm, Max Height: 60cm
